User Manual: SONOVA Music Mastering Tool

Table of Contents

---

1. Introduction

SONOVA Music Mastering Tool is an advanced platform for audio mastering and remastering, designed for musicians, producers, and content creators. It offers high-resolution processing (32-48-bit float), dynamic tools, and an intuitive workflow.

2. System Requirements

- Supported Browsers: Google Chrome, Mozilla Firefox, Microsoft Edge, Safari (latest version).

- Screen Resolution: Minimum 1280x720, Recommended 1920x1080.

- Compatible Audio Files: .mp3, .wav, .ogg.

3. User Interface

The interface includes:

- Header: Displays the logo and tool name.

- Main Controls: Buttons for selecting, processing, and downloading files.

- Audio Viewers: Panels showing audio before and after mastering.

- Equalizers: Options for customizing the sound.

- Flash Messages: Dynamic information at the bottom.

4. Core Features

- Uploading an Audio File: Click 'Select File' and choose a compatible audio file.

- Mastering Audio: After uploading, click 'Masterize' to process the file.

- Remastering Audio: Click 'Remastering' to enhance the processed track.

- Resetting the Process: Click 'Reset' to clear all fields and start over.

- Downloading the Processed Track: Click 'Download SONOVA Mastered Track.'

5. Flash Messages

Dynamic messages displayed every 5 seconds, offering tips, promotions, and technical highlights.

6. Keyboard Shortcuts

- Ctrl + O: Open file.

- Ctrl + M: Master audio.

- Ctrl + R: Remaster audio.

- Ctrl + D: Download.

- Ctrl + Shift + R: Reset.

7. Troubleshooting

- File Not Loading: Ensure compatibility (.mp3, .wav, .ogg). Check browser permissions.

- Processing Error: Restart the process with 'Reset.' Ensure the file is not corrupted.

- Download Issue: Ensure you have processed the audio before downloading.

8. Frequently Asked Questions (FAQs)

- Can multiple files be processed simultaneously?

  Currently, only one file can be processed at a time to maintain quality.

- What is the quality of the processed audio?

  The tool offers high-resolution mastering (32-48-bit float).

- Is the tool mobile-friendly?

  Yes, it is compatible with modern mobile browsers.
